## *about us*

Paint Sip Socialize is fun for all ages. Our artist will give you step-by-step instruction for your masterpiece. It's a casual class where you are sipping on your favorite drink while socializing with others in the class. We play a variety of music such as Pop, Rock, Hip Hop, R & B and Jazz.

Paint Sip Socialize is an art studio offering painting classes. Bring your Favorite Drink, Favorite People and we will take care of the rest. One of our talented artist will be with you every stroke of the way!

## *corporate retreats*

Paint Sip Socialize is a Paint and Sip Art studio that offers a unique corporate retreat opportunity. Instead of just eating and chatting about work. Let us focus on some “productive relaxation” with our team building exercises that include a piece of customized art as the theme of your event. We provide the canvas, paint etc. and you paint it. Our artist will assist you every stroke of the way. It'll give you something to take back as well as a memory to savor well beyond the retreat.

Your senior executives, managers and leadership can reignite their passion for team building and company development through some of our breakout forums and other activities. We want you to feel relaxed and allow it to be a productive get away without having to travel far from Downtown Atlanta. We are also mobile but we've found that getting away from the comfort of the office is a better experience. Art allows you to be relaxed, focused, bold and creative; the freedom to think outside of the box and see the big picture. A successful business should have the same or a similar culture.

Our hopes are that we encourage or ignite leadership to create new thought processes with colorful vision and hopefully start to mentor team members with confidence and passion through training, coaching and team building.

# corporate retreats

We believe our clients will benefit from working with us because our concept is a non-traditional corporate retreat. Our customized art work is unprecedented. PSS artist and trainers are dynamic and clearly experts in their respective fields. The participants' experience is practical, memorable and striking enough to capture their attention, while still maintaining a fit with the company's vision and goals. Our staff will personalize an agenda or we can simply utilize your agenda and insert our painting class as a piece of the course.

We can create certificates and have a small ceremony to wrap up for those in attendance. If this sounds like something that can assist your team with winning and being successful, please tell us how we can help and we'll schedule a conference call with our team to discuss your needs. We will build a course that can meet your needs varying from a few hours to multiple days or quarterly training retreats. Just Let Us Know.
